

Stimplex®

CROP BIOSTIMULANT

STIMPLEX® is a supplementary crop biostimulant derived from *Ascophyllum nodosum* seaweed extracts, and is part of a balanced nutrition program designed to maximize the production of quality fruit, vegetables, non-food and ornamental crops.

APPLICATION INSTRUCTIONS

ROOT DEVELOPMENT AND TRANSPLANT SOLUTION: Soak cuttings for 3 minutes in a STIMPLEX® solution of 12 ml/L of water before planting them to take root. Immerse the roots in a solution of 6 ml/L of water immediately before transplanting them.

FOLIAR APPLICATION: STIMPLEX® is more effective through the leaves. It can be applied with any fertilizer and with the application equipment used for pesticides. Apply with sufficient water for good crop coverage, 100 to 1000 L of water per hectare when using foliar spraying equipment.

AS SEED TREATMENT: Cover seeds with a STIMPLEX® solution of 6 ml/L of water.
