80 Crops in 70
Countries

Why *Stimplex*®?

Stimplex is a leading organic biostimulant that induces positive cytokinin activity to increase crop yield. Manufactured by Acadian AgriTech, it is exclusively derived from the most active seaweed species in the world, *Ascophyllum nodosum*, and is hand harvested to preserve the base of the plant, guaranteeing it will grow back. We use a gentle extraction process that ensures *Stimplex* gives you **maximum performance**. *Stimplex* is supported by credible research assuring you buy a consistent, top quality product you can trust. This is why top growers count on *Stimplex*; it doesn't just grow your crop, it grows a better crop.

Stimplex increases desirable yield.

Stimplex gives you more; **higher yields and better quality** meaning greater return to you. *Stimplex* is proven to elicit cytokinin activity in plants resulting in **improved health and better yields**. **Stimplex** has been trusted on over 80 crops in 70 countries to boost grower revenue.

Stimplex elicits natural cytokinin and auxin production.

Stimplex induces crops to produce their own natural growth substances like auxins and cytokinins. These initiate the growth of **full, well developed root systems** with greater fruit development and are vital to improving health and increasing yields. When used at the right time, *Stimplex* can even allow you to manage harvest better by allowing fruit to "keep" on the plant longer.

Stimplex improves overall plant health.

Optimizing plant health can greatly affect the success of your crop. *Stimplex* **optimizes plant health** by giving you a greener, more vigorous plant with improved canopy and better photosynthetic capacity. Trust *Stimplex* to deliver an overall healthier plant from rooting to harvest.

Stimplex
CROP BIOSTIMULANT

Stimplex enhances natural plant resistance to stresses.

Stimplex naturally enhances your crops' ability to **fight environmental stresses like drought and salinity**. *Stimplex* elicits cytokinin and auxin production in plants making them better able to tolerate stresses while improving yield. Trust *Stimplex* to defend your crop when it's needed most.

Stimplex is organic.

Stimplex is **organically certified and EPA registered**. *Stimplex* is compatible for use in organic agriculture under the USDA's National Organic Program. *Stimplex* gives you the confidence to know you are getting a high quality organic compliant product with proven results.

Stimplex increases root growth and early plant development.

Stimplex **elicits natural auxin production** in plants resulting in improved root growth which results in early plant development; both vital to your crops' success. Growth, quality and yield all depend on a strong plant with a large, healthy root system. Trust *Stimplex* to start your plant off right.

Stimplex enhances nutrient utilization.

Stimplex **helps improve nutrient utilization** by enhancing root growth, encouraging healthy microbial populations and containing natural sugars which serve as natural chelators. Trust *Stimplex* to help you get the most out of your fertilizer program and by doing so significantly improve yield and quality.

Trust the *Stimplex* Advantage. Be Rewarded.
